WET

**IPAD CONTROLS APP UPDATE – INSTRUCTIONS**

1   Connect the iPad to internet

2   Open the URL ACT provided in the safari browser of iPad

Example: **http://www.controlshelp.com/act/wylv**

3   Enter iPad's Serial number in the following field on website:

NOTE: In order to find the serial number, got to the iPad **Settings -> General -> About**. There is a section called serial number. Simply copy that number and paste it into the text field on the link.

4   After entering the serial number, tap on the red download icon.

5   After installation is successful, go to iPad **Settings page**, **device management** section. Make sure **"WET"** is trusted as developer account. If not, tap on the **TRUST WET** field.

6   Exit the settings screen and open the WET app. The app should be ready at this point.
